Listening (10 marks)

Situation:

During your research on the impacts of generative AI on language diversity, you came across a podcast on how GenAI is reshaping communication and education worldwide. Listen to the podcast and answer the following questions.

You will hear **TWO** excerpts from the podcast. Each recording will be played **ONCE** only.

Multiple-choice Questions (4 marks; 1 mark each)

Listen to the recording and answer the following questions:

1. How does AI primarily help break down global communication barriers?
 - a) By forcing people to learn a single common language.
 - b) By developing advanced global networking platforms.
 - ☒ c) By providing instant translations and grammar corrections.
 - d) By simplifying complex linguistic structures for everyone.
2. What is a significant benefit of AI for minority and endangered languages?
 - a) It creates completely new vocabularies for them.
 - b) It standardizes their dialects to make them easier to learn.
 - c) It limits their usage to academic research purposes only.
 - ☒ d) It helps preserve them and share their culture globally.
3. What misconception about AI's effect on language is addressed by the speakers?
 - a) That it primarily supports only one or two major languages.
 - ☒ b) That it will lead to all people writing in a similar way.
 - c) That it makes language learning much more difficult for students.
 - d) That it struggles with translating highly emotional content.

4. How does AI transform how students learn, according to the discussion?

- a) By editing student's work in grammar, vocabulary, and structure.
- b) By offering personalized support and targeted feedback.
- c) By analyzing traditional teaching materials.
- d) By requiring students to learn complex new coding languages.

Summary Cloze (6 marks; 1 mark each)

Listen to the recording and fill in the blanks with **NO MORE THAN THREE WORDS**.

Notes for "Language in the Digital Age" Podcast

1. How do AI developers address cultural concerns?

AI developers can:

- overcome (5) language biases found in earlier language models
- incorporate more varied data sets
- partnering with global experts
- create more (6) accessible AI systems

2. Great Language Flattening: Threat or Opportunity for Human Languages?

AI aims:

- not to (7) doubt humans' voice, but to *amplify* them
- to make communication more (8) dynamic

Humans should:

- use AI's power to enrich language and preserve cultural (9) diversity
- enjoy AI's advantages, but also be aware of its (10) transformation
