

Yanbo Zeng

Objective

I am a final-year student majoring in Mathematics and Statistics at Hong Kong Baptist University. I have a solid command of various mathematical and statistical techniques, including algebra, calculus, differential equations, regression, and multivariate methods. I am passionate about learning and applying new knowledge to practical problems. I highly value hands-on experience and have actively engaged in both academic projects and off-campus internships. These opportunities have strengthened my ability to connect theory with real-world applications, while also improving my communication and problem-solving skills. I look forward to contributing my analytical abilities and enthusiasm for learning to future academic or professional challenges.
